

CHARTFIELD SURGERY – PATIENT DIGNITY & PRIVACY

OUTCOME1 REG 17

INTRODUCTION

This policy sets out the Practice provision to ensure that patients are afforded privacy and dignity, and are treated respectfully, in all appropriate circumstances where there is the potential for embarrassment or for the patient to feel “ill at ease”.

The requirement to respect patients is the responsibility of all staff, not just those in direct clinical contact with the patient.

Vulnerable patients in this respect may include:

- Elderly
- Infirm
- Disabled
- Illiterate
- Homeless / no fixed abode
- Those with specific conditions
- Patients with communication difficulties
- Those patients with gender requirements
- Those known to staff / known by staff
- Family Members

PROVISIONS

Reception

- The Practice will not stereotype patients based on perceived characteristics
- Patients will be referred to with respect even in private discussions in the surgery.
- Patients will be addressed by their preferred method and titles (Mr, Mrs etc) will be used as a first preference by staff
- A sign will be available in reception to offer the facility of a private discussion with a receptionist if required
- Guide dogs will be permitted in all parts of the building
- Under no circumstances will staff enter through a closed consultation room/treatment room door without first knocking, and waiting for permission to enter (if occupied), or pausing to determine that the room is empty

Consultations

- Patients will be allowed free choice of doctor where available, and will be able to wait or delay an appointment to see their choice of clinician. Where clinically urgent, patients will be encouraged to see a clinician appropriate for their “best care” however undue pressure is not appropriate.

CHARTFIELD SURGERY – PATIENT DIGNITY & PRIVACY

OUTCOME1 REG 17

- Consultations will not be interrupted unless there is an emergency, in which case the room will be telephoned as a first step, before knocking at the door and awaiting specific permission from the clinical to enter.
- A chaperone will be offered where an examination is to take place
- Clinical staff will be sensitive to the needs of the individual and will ensure that they are comfortable in complying with any requests with the potential to cause embarrassment
- Patients will be afforded as much time and privacy as is required to recover from the delivery of "bad news", and the clinical staff will, where possible, anticipate this need and arrange their appointments accordingly
- Consideration will be taken so that Patients will be able to dress and undress in privacy and that they are afforded sufficient time to do this bearing in mind any infirmity etc.
- A clean single-use sheet will be available in each examination, changed after each patient, and the patient will be advised of its availability
- Patients with difficulty in understanding due to language may have a family member or friend available to interpret or assist
- Communication by staff to patients will be individual according to the needs of the individual patient (e.g. those with speech difficulties, hearing, or learning difficulties may need an individual approach).
- Where an intimate examination is considered necessary to be performed on a patient with difficulty in understanding due to language or other issues (e.g. consent or cultural issues) it is recommended that a Chaperone or family member/carer should always be present
- Areas used by patients for dressing/undressing will be secure from interruption or ingress
- Patients who may have difficulty in undressing may be offered the services of a Chaperone to assist
- Patients will be requested to remove a minimum of clothing necessary for the examination
- Consultations in the patient's home will be sensitive to the location and any other persons who may be present or may overhear

Post Consultation

- Clinicians and staff will respect the dignity of patients and will not discuss issues arising from the above procedures unless in a confidential clinical setting appropriate to the care of the patient (respectful of the patient even when not there)
